3.1. How to upgrade (applies to customers only) .....	1
3.2. Compatibility Notes .....	2
4. Support.....	2

## 1. Overview

The version 6.4.1 templates have been released to address a small number of bugs. The HTML Profile template is not affected by these bugs and does not therefore require a new version. No other parts of the InstantAtlas Desktop software have changed.

You only need to upgrade to the v6.4.1 templates if you believe you will be affected by the bugs we have addressed (see below).

## 2. Bug Fixes

- Google Maps background layer shows a global extent when it should not
- Map with Google Maps as background layer 'looses' the base geography for countries close to the international date line (e.g. Australia)
- Problem with zooming into the map by applying a URL filter= parameter
- Incorrect classes showing in advanced pie chart legend
- Incorrect feature highlighted in map when a bar in the discrete time series chart is hovered

## 3. Upgrading to the 6.4.1 templates

### 3.1. How to upgrade (applies to customers only)

1. Login to **My InstantAtlas** by browsing to <http://www.instantatlas.com/mialogin.aspx>
2. If you have not already registered for an account you should click the New User option.
3. Download the installer file (.exe) from the Desktop Maintenance area to the computer(s) with your current InstantAtlas installation(s).
4. Double-click the file to run the installer. Choose a language for the installation. The standard installation is recommended for most users. The advanced installation essentially allows you to install additional language features (French, German and Spanish).

1. Navigieren Sie zu <http://www.instantatlas.com/mialogin.aspx> um sich bei **Mein InstantAtlas** einzuloggen.
2. Falls Sie sich noch nicht registriert haben, sollten Sie auf den Link „New User“ klicken.
3. Laden Sie die Installationsdatei (.exe) herunter und speichern Sie diese auf dem Computer auf dem derzeit InstantAtlas installiert ist.
4. Starten Sie die Datei mit einem Doppelklick. Wählen Sie eine Sprache für die Installation aus. Für die meisten Benutzer wird empfohlen, die Standardinstallation durchzuführen. Die erweiterte Installation ermöglicht Ihnen hauptsächlich, weitere Sprachmodule (Französisch und Spanisch) zu installieren.

1. Navegue a <http://www.instantatlas.com/mialogin.aspx> para entrar en su cuenta **My InstantAtlas**
2. Si no tiene una cuenta Mi InstantAtlas, haga clic en la opción New User.
3. Descargue el fichero de instalación (.exe) en el ordenador(es) con su instalación(es) actual de InstantAtlas.
4. Haga clic-doble en el fichero de instalación. La instalación estándar conviene a la mayoría de los usuarios. La instalación avanzada sobre todo permite la instalación de otras idiomas (francés o alemán)

### 3.2. Compatibility Notes

If you have published a 6.4.0 Flash dynamic report and wish to upgrade it to 6.4.1 to benefit from the fixes listed above you can do the following:

1. Publish a report using the respective v6.4.1 template and any map data (it doesn't matter if this doesn't match the map data in the report you wish to upgrade). You can let the Publisher generate a demo data file.
2. Browse to the folder containing your v6.4.1 report. Copy the atlas.swf file.
3. Paste the atlas.swf into the folder containing the v6.4.0 report you wish to upgrade (it should overwrite the existing file).

## 4. Support

If you have any questions about this release or experience any problems upgrading please contact the GeoWise User Support Team using the details listed at [www.instantatlas.com/supportcontact.xhtml](http://www.instantatlas.com/supportcontact.xhtml).
